

Catheters for Retrograde UreteroPyelography (RUP)

The shaped bulb of Chevassu catheters allows effective injection of contrast medium. The version intended for use over guidewire simplifies endoscopic procedures.

●● A connection with a Luer-lock syringe connector is supplied with each catheter.

Catheters packed individually in peel-apart sachet.

Box of 5 - Sterile.

Length: 69 cm

Interventional catheters over guidewire

These catheters are suitable for use with a guidewire during endoscopic procedures. They are made of PEBA, for rapid insertion avoiding risk of trauma.

- A connection with a Luer-lock syringe connector is supplied with each catheter.

Catheters packed individually in peel-apart sachet.

Box of 5 - Sterile.

Length: 74 cm

Occlusion balloon catheters

Obstruction of the ureter during in situ stone fragmentation.

- Polyamide catheters with graduated markings (1- or 2-lumen). Balloon 0.2 or 1 ml. Supplied with a tap and 1 ml syringe. Length 90 cm.

Supplied with a metal stylet.

Individually packaged - Sterile.

	Occlusion catheter, single lumen 0.2 ml balloon.	Occlusion catheter, 2 lumens, 1 ml balloon 2 side eyes above balloon.
Ch/Fr	3	4.5
REF.	AC5K03	AC5L45

In-Ka *High pressure ureteral balloon dilation*

PET balloon for an effective and uniform dilation of the ureteral meatus or stenosis during endoscopic procedures.

- Kit composition:
In-Ka catheter + a screw syringe and inflating device.

Individually packaged - Sterile.
