

Tube-Fix

Securement of endotracheal tubes

Tube-Fix

Securement of endotracheal tubes

Securement device for endotracheal tubes

Tube-Fix is especially designed to secure the position of oral endotracheal tubes for artificial ventilation with minimum risk of creating pressure points.

Two versions

Ref. No. 650M is designed for securement of oral endotracheal tubes together with guedel airways, and Ref. No. 655M for securement of oral endotracheal tubes alone.

Both Ref. Nos. 650M and 655M allow easy access to the mouth and pharynx for suction and oral care.

Two different materials

Tube-Fix is available in two types of materials. Both materials are manufactured with a skin-friendly medical grade adhesive, suitable for both the patients face and the oral endotracheal tube.

REF.	Description	Inner Box Quantity	Outer Box Quantity
650M-F	Endotracheal Tube & Guedal Airway	100 pcs	2000 pcs
650M-M	Endotracheal Tube & Guedal Airway	100 pcs	2000 pcs
